

### **Laws to remember...**

- Ride your bike on the right hand side of the road.
- Always ride in the same direction as the cars.
- Use a bike path if one is available.
- If you are with others, ride single file, not side by side.
- When on the sidewalk remember to be careful around the people that are walking.
- Always wear a bicycle helmet!
- Obey all traffic signs.

### **Safety Rules...**

- Stop your bike at street corners.
- Look to the right, left, and behind you before you start to cross the street. Make sure all cars stop and drivers see you before you step into the street.
- If the light is red, you need to stop just like the cars.
- If the light is green, you should check that all cars see you before you cross the street.
- Walk your bike when you are in the crosswalk.
- Wear light colors and reflective strips when riding at night.
- **Always wear a bicycle helmet!**

### **Skates and Skateboards...**

#### **Bike safety tips are useful when you use skates or a skateboard too!**

- Ride on sidewalks, not in traffic.
- Do not ride through crosswalks. Carry your skateboard in your hand so you do not startle other pedestrians and so you don't fall in the roadway.
- Never hang onto a moving vehicle when on your bike, skates, or skateboard.

**Always wear a bicycle helmet!**
